

You're invited to  
**A New Economy for North Queensland**  
**Two Day Symposium Saturday 14 & Sunday 15 July 2018**  
**Amaroo On Mandalay • Magnetic Island • NQ**

The Symposium will be held for two days on glorious Magnetic Island, 25 minutes north of Townsville by passenger ferry.

North Queensland - bountiful natural resources and a wealth of human talent. But the model on which our society is currently based results in degradation of natural resources, uncertainty of business and employment, and ongoing concerns about social justice.

Time and time again, our faith is placed in the latest 'silver bullet' project: a new local attraction, a new mine, a new dam for more irrigated agriculture, a new satellite suburb. So often such proposals come at an economic, social and environmental cost.

The 2018 A New Economy for North Queensland Symposium will bring together people exploring new, more sustainable ways of doing things in areas such as food and energy, work, production and consumption, social enterprise, the built environment, income distribution, and population. It will be an opportunity to look outside the box, to creatively question traditional ways of doing things, and to explore new options for a fair, flourishing and sustainable region.

**Our goal is clear: Communities and economies that fit within the productive capacity of a healthy environment.**

## KEYNOTE SPEAKERS INCLUDE

- **Kate Raworth** Doughnut Economics, UK (via internet)
- **Richard Denniss** the Australia Institute
- **Charles Massy** Regenerative Agriculture
- **Michelle Maloney** New Economy Network Australia (NENA)
- **Tim Buckley** Institute for Energy Economics and Financial Analysis (IEEFA)
